LaVallée
2nd Birthday

Zoveel Many Trees >< Abattre

First came the will to tell, in numbers, singular writings in which each one is a tree with spreading branches. Building this tale can only be done from the inside, that being meeting all and each of these practices and listening to what they are without preconceptions. Today, with the exhibition we have the possibility to establish this path. Just as a wanderer following a track in materialized spaces, cut out by elements and images. One must know how to decide. If LaVallée has for the last three years progressively taken shape, we want to show the irrigating strength, strength made of joys, common interests and exchanges. We want a celebration, an anniversary; we want to invite anyone to live, during the event, our customs, our constant activity. As we call it "the work to be chopped down".

It is then needed by crossing our discussions to link the riddle to the virtual, the didactics to the manufacture, to have mediate time and outputs in performances, to create discursive polarities, antagonisms, lines of force as trajectories. Trees to be chopped down, yes, no doubt, though not really. But above all, we have to make conspicuous our forms of life.

TENTOONSTELLING

Zoveel Many Trees >< Abattre

Eerst goesting hebben om te vertellen, met het aantal. Het aantal onvergelykbare manieren van schrijven, waar iedereen een boom is met wijdvertakte takken. Dit verhaal vertel je alleen van binnenuit; je ontmoet één voor één deze werken en je luistert er onbevangen naar. Als een wandelaar op weg te midden van getekende ruimtes, versneden door beelden en elementen. Je moet (knopen) kunnen doorhakken. Sinds twee jaar nu groeide La Vallée gestaag, we willen de kracht die het inspireert laten zien, een kracht vol jolijt, interesse en uitwisselingen. We willen een verjaardag, een feest, iedereen uitnodigen om tijdens het evenement onze gewoontes, onze dagelijkse activiteiten, 'het te verzetten werk' te beleven. Doorheen onze discussies verbinden we de leerpraktijk aan het maakproces, het raadselachtige aan het virtuele, we hebben het heden nodig en performances, discursiviteit wordt gecreëerd, antagonismen, en krachtlijnen als trajecten uitgetekend. Bomen om te verzetten, ja, ongetwijfeld, hoewel, we willen vooral onze levensvormen zichtbaar maken.
